

Summary

Systems-driven Applied AI operator and orchestrator. Designs, deploys, and maintains multi-provider LLM workflows in regulated and high-stakes operating environments – compliance-grade document and bid automation, safety- and quality-management systems, multi-tier AI-literacy onboarding for non-technical operators, and multi-provider media orchestration across image, voice, and video. Close to two decades operator-side across finance, energy, education, marine, and AI consulting.

Core Skills

MODELS & ORCHESTRATION	Anthropic Claude, OpenAI ChatGPT/Codex, Google Gemini, xAI Grok; open-weights via Ollama and Hugging Face. Provider-neutral API harness with cost-logged routing; eval loops absorb model-drop syntax and behavior diffs so deployed systems keep working.
AGENT & BUILD STACK	Claude Code (skills, subagents, worktrees, hooks, /loop, /schedule), Codex CLI, Gemini CLI, Grok endpoints; MCP authoring across Playwright, Slack, Gmail, Figma; AGENTS.md / CLAUDE.md authoring; prompt caching; approval-gated tool-use. Python, TypeScript, Swift/SwiftUI, React/Next.js; Vercel, Cloudflare, Supabase, Postgres.
SYSTEMS DISCIPLINE	Process capture into reusable automation substrates (client IP preserved); RAG pipelines for high-stakes document workflows; HITL with approval gates; structured-context capture and change-management framing for non-technical adopters; eval frameworks for retrieval and output drift.
MEDIA AI	Image, voice, video, and 3D via CLI, API, and hosted platforms. Stack: Seedance, GPT media models, Gemini, Grok, Fal, ElevenLabs, ComfyUI, Meta SAM 3D – selected per task on quality, cost, and privacy fit.

Recent Work

BID ENGINEER	Compliance-library bid automation for a regulated-industry client. YAML-distilled SOW frameworks, branded Word/PDF/Excel pipeline, audit-grade document control. Multi-week tender cycles compressed to hours; in active use, with Anthropic-SDK augmentation queued for v2.
SAFETY + QUALITY MANAGEMENT	SMS for a downstream operator and an internal QMS for the consulting authority. Audit-trail rigor per ISM Code / ISO-9001-style frameworks; approval-gate discipline at every operator-decision boundary.
AI-LITERACY ONBOARDING	Multi-tier six-week service for non-technical operators dropped by off-the-shelf chat tools. Personal-wiki scaffolding, structured-context capture, safety-guardrail walkthroughs. Productized as a Softworks offering across multiple clients.

Experience

Softworks · sftwrks.com – Founder · AI Integration Services	2020 — Present
Operator-advisory practice serving clients across finance, energy, education, marine, and creative-tech. Recent work above; full case studies on request.	
Univelcity · univelcity.com – Co-Founder (advisory since 2022)	2017 — Present
Co-founded a Lagos design and coding school. Designed the project-based curriculum and operator-onboarding pedagogy that now seeds the AI-literacy onboarding service for non-technical operators. Built the operational backbone.	
Bourbon Offshore · bourbonoffshore.com – Marketing & Communications Coordinator	2011 — 2016
Corporate communications for a global offshore oil-and-gas maritime operator (Marseille, France); stakeholder voice across clients, vendors, regulators, and maritime media.	
Standard Bank of South Africa · stanbicibtcbank.com – Administration / Procurement Officer	2008 — 2011
SAP-driven procurement and supplier relationships inside a major African banking group; applied early data analytics to supplier selection.	

Education

Federal University of Technology, Minna – B.Tech., Physics & Telecommunications	2007
